**Note: according to various reports of the Department of Environment (DoE) of the Islamic Republic of Iran*

*** Two captive-bred birds were released. One of them migrated along with wild single Siberian Crane, the other started migrating, but soon landed and couldn't fly. It was kept until November 2005, when she was released again.*

**** In winter 2006/07 two single Siberian Cranes arrived in Fereydoonkenar, where they stayed separately. In the middle of January one Siberian Crane disappeared and the second Siberian Crane started spring migration along with captive-bred released female.*
